Hitting flying saucer in Frame 3 determines the point value of the rest of the Monsters of that frame.

TIPS TO BEAT HIGH SCORE

1. In Frame 3, if you hit the first 10 monsters in succession, a flying saucer appears. Shoot the saucer. Whatever number appears when you hit it will be the point value of the rest of the monsters in the frame.

2. In frame 4, be sure you shoot the first monster that appears. An accurate shot will allow you to proceed to Frame 5 and 6. If you miss the first monster but hit the second you can only proceed to Frame 6.

Spiraling monster appears in random positions on the screen. No points are scored while in motion.

When you clear the screen, a new pattern of humanoid monsters appear with one extra monster added. You must clear the screen of the humanoids 5 times.

Speed is important if you want to clear off the whole screen within the time limit.

Total Shock!
Shoot one end it splits into two. Shoot the divided pair and again they split. Where will it end?
